LEAD RISK ASSESSMENT QUESTIONS

- Yes No 1. Since the last oral risk assessment, have there been any significant changes in day care, your home, hobbies or occupation? If no, using the medical providers professional judgement, only pertinent questions to assess current risk should be asked, such as #10.
- Yes No 2. Has mother of the infant worked or lived where she has been exposed to lead?
- Yes No 3. Does your child live in or frequently (once a week or more) visit a house build before 1960?
- Yes No 4. Does the house have peeling or chipping paint inside or outside?
- Yes No 5. Is there old furniture or painted woodwork that your child can chew on (crib, Banister)?
- Yes No 6. Does your child exhibit pica? Eats non-food substances ; ice, plaster, paint, Hair, or gravel.
- Yes No 7. Does your child live in a house built before 1980 with recent, on-going or planned renovation or remodeling?
- Yes No 8. Does your child live or frequently visit a home near a heavily traveled major highway where soil and dust may be contaminated with lead?
- Yes No 9. Does your child regularly eat from ceramic or pewter dishes? Is food stored in tin cans, ceramic-ware or pottery?
- Yes No 10. Have any of your children or their playmates heard of lead poisoning?
- Yes NO 11. What are the occupations of all household members and frequent visitors? Does your child frequently come in contact with an adult who works with lead? (Construction, welding, pottery or other trades practiced in your community.)
- Yes No 12. Does anyone in the household have a hobby, which uses lead? (fishing, weights, casting ammunition, toy soldiers, making stained glass, pottery, refinishing furniture, burning lead-painted wood.) Ask those appropriate for your area.
- Yes No 13. Does you child live near a lead smelter, battery recycling plant, or other industry likely to release lead? Does your child live near a source of current industrial pollution or on a site of the old industry or mining?

OVER →

Yes No 14. Do you give your child any home or folk remedies, which may contain lead? The medical provider should note that many of these remedies are no longer legal in the U.S. and there may be some reluctance to discuss them (Examples containing lead are: Alarcon, Alkohl, Azarcon, Bali, jGoli, Coral, Ghasard, Greta, Liga, Pay-loo-ah and Rueda.)

Yes No 15. Does your home's plumbing have lead pipes or copper with lead solder joints? Have there been any plumbing repairs of fixtures added within the last 5 years?
